

CONTENT

I.	Forest Status	1
	Ecoregion of Indonesia	1
	Forest Ecosystem	1
	Forest Coverage	6
	Forest Classification (Forest Land Use)	10
	Deforestation	12
	Investment of Forestry	19
	Forest Plantation	20
	Land Degradation	26
II.	Seed Sources and Seed Processing	27
	Seed Sources	27
	Seed Collection Zone	27
	Identified Seed Stands	28
	Seed Production Areas (SPA)	29
	Seed Orchards	29
	Phenology	31
	Seed Collection	34
	Seed Processing of some commercial timbers in Indonesia	
	Introduction	36
	Current Step in Seed Processing	37
	General methods of seed processing of several	
	tree species	40
III.	Nursery Establishment and Management	51
	Advantages of Setting up a Nursery	51
	Pointers in Nursery Site Selection	51
	Types of Nurseries	52
	Nursery Physical (Structural) Requirement	53
	Production of Planting Stocks in the Nursery	53
IV.	Plantation Establishment	69
	Plantation Plan	69
	Planting Site Selection	69
	Kind of Plantation	71
	Planting Distance (Spacing)	74
	Site Preparation	79

Dispatching of Planting Stocks	81
Outplanting	82
Direct Seeding	86
V. Care and Maintenance	88
Replanting, Weeding, Pruning and Thinning	88
Protection	91
Important Insect Pest in Plantation	91
Important Disease in Plantation	104
VI. Plantation Management	112
Growth, Yield and Economic Rotations of Plantation	
Species	112
Harvesting Systems and Wood Transportation of Forest	
Plantation in Indonesia	129
VII. Policies and Regulation	152
Land Tenure	152
Tax for Land Income	154
Loan	156
Central Government Incentive	156
Local Government Incentive	163
VIII. Community Forestry	165
Government policies towards forest dwellers	165
The government's community forestry program	166
Decentralization	167
Case Study	168
